

Improved Job Description

Job Title: Front-End Developer

Location: Flexible

Employment Type: Full-time

Summary / Purpose of the Role:

Responsible for building and enhancing user-facing web interfaces for web applications and websites. This role involves translating UI/UX designs into functional interfaces, maintaining existing pages, resolving UI bugs, and ensuring an optimal user experience. Candidates across all experience levels (junior to senior) are encouraged to apply, provided they can fulfill the core responsibilities.

Key Responsibilities:

- * Develop and update web pages and UI components using HTML, CSS, and JavaScript.
- * Implement responsive layouts compatible with desktop, tablet, and mobile devices.
- * Integrate front-end components with APIs for data fetching and display.
- * Identify and resolve UI bugs, layout issues, and basic performance problems.
- * Collaborate with design and back-end development teams to implement requirements.
- * Adhere to coding standards, version control practices, and documentation guidelines.
- * Propose improvements for usability and front-end implementation.

Must-Have Requirements:

- * Practical experience in front-end interface development (via work, internships, or significant personal/academic projects).
- * Solid understanding of HTML5 (semantic elements, forms, basic structure).
- * Solid understanding of CSS3 (layouts, positioning, responsive basics, fonts, colors).
- * Solid understanding of JavaScript (ES6 basics: variables, functions, arrays, events, simple DOM manipulation).
- * Proficiency with at least one modern front-end framework (e.g., React, Vue, Angular) OR a CSS framework (e.g., Bootstrap, Tailwind) combined with strong vanilla JavaScript.
- * Basic familiarity with Git and common version control workflows (clone, commit, push, pull).
- * Ability to interpret design mockups (e.g., Figma, XD, or similar) and translate them into code.
- * Ability to debug basic front-end issues using browser developer tools.

Nice-to-Have / Preferred Requirements:

- * Experience with React and its ecosystem (hooks, basic state management, routing).
- * Experience with TypeScript in front-end projects.
- * Experience connecting to REST APIs and handling JSON data in complex flows.
- * Exposure to performance optimization and accessibility best practices.
- * Basic front-end testing experience (e.g., Jest, React Testing Library, or similar).
- * Experience working in a team environment (e.g., Agile/Scrum, code reviews).
- * Familiarity with front-end build tools/bundlers (e.g., Webpack, Vite, npm/yarn).

Technical Skills:

- * Core Web Technologies: HTML5, CSS3, JavaScript (ES6+).
- * Frameworks / Libraries: React, Vue, Angular (at least one required), or strong vanilla JS with a CSS framework (e.g., Bootstrap, Tailwind).
- * Version Control: Git, experience with code hosting platforms (e.g., GitHub, GitLab, Bitbucket).
- * Tooling (Preferred): npm/yarn, bundlers/build tools (e.g., Webpack, Vite).

Soft Skills:

- * Ability to learn and adapt to existing codebases and standards.
- * Clear and concise communication with team members.

- * Strong attention to detail in design implementation and UI issue resolution.
- * Effective task management, proactive questioning for clarity, and ability to work both independently and collaboratively.

MUST-HAVE REQUIREMENTS:

- Practical experience in front-end interface development (via work, internships, or significant personal/academic projects).
- Solid understanding of HTML5 (semantic elements, forms, basic structure).
- Solid understanding of CSS3 (layouts, positioning, responsive basics, fonts, colors).
- Solid understanding of JavaScript (ES6 basics: variables, functions, arrays, events, simple DOM manipulation).
- Proficiency with at least one modern front-end framework (e.g., React, Vue, Angular) OR a CSS framework (e.g., Bootstrap, Tailwind).
- Basic familiarity with Git and common version control workflows (clone, commit, push, pull).
- Ability to interpret design mockups (e.g., Figma, XD, or similar) and translate them into code.
- Ability to debug basic front-end issues using browser developer tools.

NICE-TO-HAVE REQUIREMENTS:

- Experience with React and its ecosystem (hooks, basic state management, routing).
- Experience with TypeScript in front-end projects.
- Experience connecting to REST APIs and handling JSON data in complex flows.
- Exposure to performance optimization and accessibility best practices.
- Basic front-end testing experience (e.g., Jest, React Testing Library, or similar).
- Experience working in a team environment (e.g., Agile/Scrum, code reviews).
- Familiarity with front-end build tools/bundlers (e.g., Webpack, Vite, npm/yarn).
